DELOITTE X FORAGE — VIRTUAL JOB SIMULATION

Data Analytics Job Simulation

A Professional Job Simulation Completion Report

PROGRAM DURATION

August 2026

STUDENT CREDENTIALS

Adeel Khan Khan

Enrollment / Roll No.

2410031158

Program & Semester

B.Tech (CSE)

HOST ORGANIZATION

Deloitte

Virtual Job Simulation via Forage

Candidate & Program Overview

Candidate Details

Student Name: ADEEL KHAN KHAN

Roll Number: 2410031158

Degree: B.Tech (Computer Science & Engineering)

Academic Batch: 2026-2027

University: IILM University, Greater Noida, U.P.

Job Simulation Profile

Program Name: Deloitte Data Analytics Job Simulation

Specialization Domain: Data Analysis & Forensic Tech

Duration: Self-Paced Program (August 2026)

Certificate ID: 6a954fdb67ce60d3ba9e2c51

Enrolment Verif. Code: 6a95518367ce60d3ba9e79b6

Organization Profile: Deloitte

Deloitte is one of the world's largest professional services networks, operating globally under its guiding purpose of *"Making an Impact that Matters"*.

-  **Forage Collaboration:** Delivered as a free, self-paced virtual job simulation on the Forage platform, giving students real-world exposure to Deloitte's work.
-  **Practical Exposure:** Simulates authentic on-the-job tasks from Deloitte's Data Analytics practice, bridging classroom learning and real client work.
-  **Core Focus Domains:** Data Analysis, Data Visualization, Forensic Technology, and Fraud Investigation Support.

 Robotic Process Automation and AI Dashboard

Problem Statement & Business Context

The Industry Challenge

Organizations generate huge volumes of raw data, but this data has little value until it is cleaned, analyzed, and interpreted correctly to support real business and legal decisions.

A spreadsheet full of numbers means nothing on its own until it is investigated, visualized, and translated into a clear, actionable recommendation for stakeholders.

The Solution Scope

This job simulation covers the practical workflow of a Data Analyst at Deloitte: cleaning data and using forensic technology to support an investigation.

Applying real consulting tools and techniques (spreadsheet analysis, data dashboards, forensic technology concepts) to convert raw data into a client-ready memo and recommendation.

Core Simulation Objectives

Data Cleaning & Analysis

Interpret an unstructured client dataset, identify what information is relevant, and organize it into a clean, structured format for analysis.

Data Visualization

Build a dashboard that highlights key patterns, outliers, and relationships in the data so findings are easy for stakeholders to understand.

Forensic Technology

Apply forensic technology concepts to trace transactions, flag anomalies, and support a fraud or compliance investigation with evidence.

Insights & Reporting

Translate technical findings into a clear, professional memo with a recommendation that a non-technical business audience can act on.

Tools & Analytical Toolkit

Data Analysis

Core Tools: Microsoft Excel, Data Cleaning & Formulas

Data Interpretation: Pivot Tables, Trend & Ratio Analysis

Forensic Technology

Investigation Support: Transaction Tracing, Anomaly Flagging

Evidence Handling: Data Integrity & Chain-of-Custody Basics

Visualization

Dashboarding: Charts & Summary Views

Design Principles: Clarity, Accuracy, Audience-First Design

Communication

Reporting: Business Memos & Executive Summaries

Recommendation: Evidence-Based, Action-Oriented Advice

Data Analytics Workflow

Data Layer: Raw client data collected and validated for completeness.

Cleaning Layer: Data cleaned, structured, and organized in Excel for analysis.

Forensic Layer: Forensic technology applied to trace transactions and flag anomalies.

Visualization Layer: Key patterns and findings presented through dashboards and charts.

Reporting Layer: Findings summarized into a clear client memo with recommendations.

Simulation Roadmap (Steps 1 to 4)

Simulation Roadmap (Steps 5 to 8)

Key Tasks & Demonstrated Skills

- ✓ **Forensic Technology Dashboard:** Built a data dashboard to trace transactions and flag anomalies for a forensic investigation.
- ✓ **Data Cleaning & Structuring:** Organized a large, unstructured client dataset into a clean, analysis-ready format in Excel.
- ✓ **End-to-End Data Analysis:** Interpreted raw data end-to-end, from cleaning through analysis to a final business recommendation.
- ✓ **Data Visualization:** Created charts and dashboards that made complex findings clear for non-technical stakeholders.
- ✓ **Client Communication:** Wrote a professional memo summarizing findings and recommending a clear course of action.

Certification & Official Verification

Verification Metric	Official Record / Credential Details
Job Simulation Title	Deloitte Data Analytics Job Simulation
Issuing Organization	Deloitte (via Forage Virtual Job Simulation Platform)
Skills Demonstrated	Data Analysis and Forensic Technology
Certificate ID	6a954fdb67ce60d3ba9e2c51 (Issued: Aug 31, 2026)
Enrolment Verification Code	6a95518367ce60d3ba9e79b6
Issued By	Tina McCreery, Chief Human Resources Officer, Deloitte

Certification & Official Verification

Deloitte.

Adeel khan Khan
Data Analytics Job Simulation

Certificate of Completion
August 31st, 2026

Over the period of August 2026, Adeel khan Khan has completed practical tasks in:

Data analysis
Forensic technology

Tina McCreery
Chief Human
Resources Officer,
Deloitte

Enrolment Verification Code 6a95518367ce60d3ba9e79b6 | User Verification Code 6a954fdb67ce60d3ba9e2c51 | Issued by **Forge**

Thank You!
